Addendum to Survey Request for Chemical Recovery  
Company, Elyria, Ohio

Jon Barney *15/*  
Permit Assistance Section

Curtis Ross, Director  
Central Regional Laboratory

Due to the nature of the samples collected during the subject survey,  
and the observations recorded by the field staff at the site, it has  
been necessary to make some changes in the analytical portion of the  
November 8, 1979, survey request. The ten samples which were collected  
should be analyzed as outlined in the attached telephone memorandum  
from Leon Aclerto and me to Rich Winklhofer and Dan Watson.

If you have any questions, please call me at 886-6109.

Subject: Survey at Chemical Recovery Company, Elyria, Ohio

---

Summary:

We discussed the survey carried out at the subject facility by Dan Watson. We agreed that the following analyses should be performed:

- a. Metals (see item III(a) of survey request) on the water sample, 3 sludge, and 2 soils (not including the 1 spill soil sample).
- b. PCB (see item III(b) of survey request) on all samples except the 1 spill soil sample.
- c. GC-MS (see item III (c) of survey request) on the 1 water sample and the 2 soil samples (not including the spill soil sample).
- d. GC-MS (see item III(d) of survey request) on the 3 sludge, 3 solvent samples, and the 1 spill soil sample.
